Hi Tara,

I wonder if you've had a chance to update the Venice database since our conversation a few weeks ago. As I recall, you had some changes to make and there were those four parcels which had a formula that needed correction.

The most recent database I have is from June 30th which was before our conversation. I wanted to do a final cross-check with the ER & MDP, and will need a definitive database. I'd appreciate your sending it to me.

Thank you and have a good weekend.

Funny you should ask. I just spent a few hours at the assessor's office pulling some of the owner/mailing data which was missing for some parcels (many of which were fairly recent condos that a had no data last time we pulled.)

With regards to adding a parcel, we discovered it was 100% residential and are not going add it.

I do have an update to LAUSD's square footage, but that will be the only change other than the new owner/mailing info.

I should be sending that to you on Monday!

P.S. I will also search for that handful of formulas that are throwing off the sort.
